

T.E.A.M. Clinic at Children's Care

Tone Evaluation And Management

A collaborative approach to increasing functional capabilities for persons with special needs.

The Children's Care TEAM Clinic offers the optimal treatment experience for individuals with tone and mobility management issues.

Your patient receives the undivided attention of a collaborative team led by two highly specialized physicians, rehabilitation physician **Dr. Julie Johnson** and neurologist **Dr. Jorge Sanchez**. The team may also include one or more of many specialists on the Children's Care staff—a physical therapist, occupational therapist, speech therapist, nurse, orthotist, prosthetist, or highly trained equipment technician. These team members care for and treat patients with tone and mobility issues every day, and are available beyond the clinic appointment to provide quality care for children and adults.

Individuals needing splints, braces, or wheelchairs can have their equipment customized for the best fit and comfort on site, often at the same visit.

The Children's Care Rehabilitation Center is easy to find—conveniently located on 41st Street in Sioux Falls—with easy parking and direct building access.

Personal attention, team expertise, support services, an accessible facility—the TEAM Clinic provides a treatment experience that will lead to the best outcomes.

Drs. Johnson and Sanchez look forward to partnering with you. **For more information and an appointment for your patient, please contact Referral Specialist Becky Deelstra-Speck at (605) 782-2379.**
